

MASSACHUSETTS BASIC SKILLS TESTING PROGRAM REPORT, 1987-88

This report summarizes the Basic Skills Test results from the second administration of the tests in October 1987. These results reflect the standard established by the State Board of Education last spring — 65% correct in the reading and mathematics tests and a required level of writing proficiency for the essay portion of the tests.

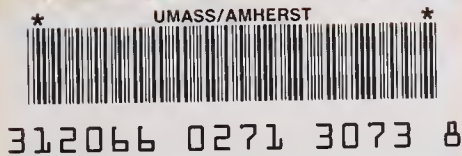

Basic skills mastery is one of the *Goals of Education in Massachusetts* adopted by the State Board of Education in 1987. Achieving this goal is a collective enterprise involving both local and state personnel and I feel confident that through our combined efforts we shall succeed.

BACKGROUND

The Massachusetts Testing Program, mandated by the Massachusetts Public School Improvement Act of 1985 (Chapter 188), has two components. The first of these, curriculum assessment testing to assist in the improvement of curriculum and instruction, is addressed by the biennial Massachusetts Educational Assessment Program. The Basic Skills Testing Program, the second component of statewide testing, is designed to identify students who need assistance in mastering basic skills.

The Basic Skills Testing Program replaces the testing required under the former Basic Skills Improvement Policy with uniform statewide tests and standards for grades 3, 6, and 9. The 1986-87 school year was the first year of implementation of the new program; the reporting of results for that test administration did not include a statewide standard. Based on the first year's results, the Massachusetts Board of Education established statewide standards in reading, mathematics and writing that are reflected in the enclosed reports for 1987-88.

PURPOSE

The purpose of the Basic Skills Testing Program is "to identify students who have not achieved mastery of basic skills," defined as the skills in reading, writing and mathematics that allow students to participate successfully in their regular grade class work. To fulfill this purpose efficiently and reliably, the Basic Skills test questions discriminate between students who have mastered basic skills and those who have not. The tests are not intended to distinguish more finely among levels of basic skills mastery.

ADMINISTRATION OF THE TESTS

With the exception of certain exempted students, the Basic Skills tests were administered to all grade 3, 6, and 9 public school students between October 5 and 23, 1987. Three weeks were provided to accommodate make-up testing.

DEVELOPMENT OF THE TESTS

All questions used in the Massachusetts Basic Skills tests were newly developed for the program. The Department of Education convened advisory committees of teachers and curriculum specialists in reading, writing and mathematics to set objectives for the tests. These objectives were reviewed by school personnel via a statewide survey. Their responses supplemented the information received from the advisory committees to develop the final objectives for the program. A large pool of possible test questions that measure those objectives was developed and administered during the first round of the Basic Skills tests to a statewide sample of students. Additional field testing of more test questions was completed during the spring of 1987.

From this pool, the 1987-88 Basic Skills tests were developed by selecting test questions that covered the range of objectives and met the difficulty level established by the Board of Education. Once final tests were constructed, they were reviewed by an equity concerns committee to insure that the tests would be fair for students of all backgrounds.

MASSACHUSETTS BASIC SKILLS TESTING PROGRAM

Reporting 1987-88 Results

The Basic Skills Tests:

| | | |
|--|-----------|--|
| ● measure mastery of minimal level skills, not overall achievement | therefore | one cannot generalize to overall student achievement. |
| ● are aimed at identifying students needing remedial assistance | therefore | the tests do not distinguish among levels of mastery. |
| ● are given at only three grade levels | therefore | generalizing to an entire school or district can be misleading. |
| ● are not diagnostic or prescriptive | therefore | schools will need to diagnose learning problems and determine corrective procedures. |
| ● are administered at the beginning of the school year | therefore | represent prior and cumulative learning. |
| ● identify students who perform poorly for a variety of reasons | therefore | generalizing about reasons for poor performance is misleading. |

The Basic Skills Reports:

| | | |
|--|-----------|---|
| ● are for 1987 tests which are not exactly equivalent to 1986 tests | therefore | caution is required when making comparisons to 1986 results. |
| ● in 1986, showed no statewide standard for passing | therefore | 1987 results are not directly comparable to 1986 results. |
| ● are for tests designed to identify individual students needing remedial assistance | therefore | programmatic evaluation is not appropriate unless a school or district has high percentages and numbers of students who fail the tests. |

UNUSUAL CIRCUMSTANCES AFFECTING TESTING AND REPORTS

Massachusetts school superintendents were asked to provide information on "any unusual systemwide circumstances that . . . should be included in the public reporting of the statewide test results." The responses of superintendents who chose to report such circumstances are as follows and should be noted when reviewing and reporting their districts' results.

| | |
|-------------------|---|
| Arlington: | Due to an error in test administration, one of the two sixth grade classes at Pierce School did not submit final drafts of the Basic Skills writing sample. |
| Boston: | A twenty-three day bus strike adversely impacted both the numbers of students tested as well as individual student results. The first day that bus service resumed (i.e., October 13, 1987) coincided with the first day of testing. Enrollment did not stabilize immediately and the loss of instruction for many students adversely affected their performance. |
| Cambridge: | Original writing samples of one grade 3 class were lost. The class has been retested and results are pending. |
| Easton: | Installation of heating system was not completed at Middle School (grade 6) consequently classrooms were extremely cold. |

| | |
|---------------------|---|
| Framingham: | Due to an error in test administration, the scores of 25 students at the Potter Road School were invalidated. Therefore, the third grade enrollment is reported as 26 instead of 51 students. |
| Lawrence: | Two factors had a negative impact on the Basic Skills results for the Lawrence Public Schools. Due to the district's enormous transiency rate, the Lawrence school enrollment was not stabilized at the time of testing in October. This accounts for the high number of unknown students. Secondly, during the week of testing at Lawrence High School, there were several unforeseeable, thus unavoidable, disruptions which may have had a negative effect on testing. |
| Lynn: | Original writing samples of one grade 3 class were lost. The class has been retested and results are pending. |
| Medford: | Medford experienced a teachers' strike on October 5, 6, & 7, 1987. |
| Northbridge: | Due to constructional renovations of the junior-senior high school, students began school on September 14, approximately two weeks later than usual. Construction is still ongoing, making for continued disturbances in some areas. |

SUMMARY OF DISTRICT PERFORMANCE

District:

Code: District code

Date: October 1987

Region: Massachusetts regions 1-6

Summary of Students Tested

This table includes the numbers and percentages of students tested and exempted for the state and the district in the three content areas and grade levels tested in the Basic Skills Program.

The state-mandated exemptions are:

- * students who are incapable of performing ordinary classwork in English as determined by the English Language Proficiency Assessment and who have been enrolled in transitional bilingual education programs for fewer than three full years, unless a written request was submitted by the parent that the student be tested;
- * special education students if exemptions were requested in writing by the parent.

Bilingual and special education students could be exempted from one, two, or all three tests.

All other students, whether actually tested or not, are included in district results. The number of students listed as "Eligible" is the number of students enrolled in the district, minus the number of students exempted from testing. Comparisons of different districts' results are difficult because the populations tested may not be comparable. Significantly larger or smaller percentages of students exempted would have an obvious impact on the results.

Summary of Student Performance

This table provides the overall results for the state and district for each test and each grade level. The Board of Education set 65 percent correct as the state-wide standard to pass the reading and mathematics tests, and identified a level of skill necessary to pass each writing test.

The "unknown" category identifies students who did not provide sufficient evidence of their mastery of basic skills to make a pass/fail judgment. In reading and mathematics, these were students who were eligible for testing but did not turn in a test booklet, or who returned a test booklet but made no attempt to answer any of the questions. For writing, the "unknown" category includes students who did not write an essay and also who wrote an essay judged not scorable (i.e., wrote an off-topic paper, one that was too brief to evaluate, or wrote no final draft of their paper).

The statistics reported include the number and percentage of students eligible for testing who were in each of the three possible outcome categories (pass, unknown, and fail) for the district, and corresponding percentages for the state. A Comparison Score Band for the district is reported, which enables a district to compare its results to others with similar Background Factors. Background Factors are based upon the socioeconomic makeup of the student population.

Summary of Numbers of Tests Passed

This table provides the numbers of tests passed by those students who were eligible to take all three tests — i.e., students who were exempt from none of the Basic Skills tests. Students who were exempted from even one test are not included in the results in this table.

The number and percentage of students who met the state standard on 0, 1, 2, and all three tests are given for the district and the state.
